

Instructions — CWD Susceptible Species Movement Record

This form was created to facilitate the reporting of movements of CWD Susceptible Species as required by TAHC regulation 40.5. A copy of this regulation may be viewed [here](#) or by visiting the Statutes & Rules page of the TAHC website and clicking on the Texas Administrative Code link.

Form Completion

- **PIN or LID:** Unique Premises Identification number obtained from TAHC Central or Region Offices. Herd owners may call either office to obtain this number.
- **County:** County where premises is located.
- **Owner's Name:** Name of owner or contact person such as ranch manager.
- **Ranch Name:** Name of facility where susceptible species are located. If Ranch Name is the same as Owner Name, write the owner name in this block.
- **Mailing Address:** Mailing address of premises.
Enter City, State, and ZIP on line below.
- **Phone:** Phone number of contact person.
- **Physical Location of Herd (911 Address or description):** Physical location information in 911 address format (*example:* "123 FM 71") or in descriptive format (*example:* "On Hwy 71 3 miles south of intersection of Hwy 71 and US 290").
- **Latitude/Longitude:** Lat/Long coordinates should be obtained at the entrance to the premises where the animals are located. These coordinates should be recorded in decimal degrees format. If you are not able to obtain coordinate data for the premises, leave this blank.
- **Type of Movement:** Completed by the owner of the premises of origin. Check appropriate box and follow applicable instructions below.
 - **Private Treaty Sale:** Sale of animals to an individual without being sold through a public auction. Seller and buyer complete their respective portions of the document and submit to TAHC.
 - **Movement to Non-contiguous Premises:** Movement of an animal between separate premises under the same ownership. In this instance, the premises of origin and premises of destination blocks will be completed by the same person and submitted to TAHC as one completed document.
 - **Public Auction:** Provide name of auction facility. When animals are to be sold through a public auction, only one animal or sales lot should be entered per record. The record(s) will be initiated by the seller and should be submitted to TAHC with corresponding copies accompanying the animal(s) to the auction which will be provided to the buyer post sale. The buyer will then complete the premises of destination blocks and submit to TAHC. If the buyer is a broker but the animal is never off loaded onto an intermediate premises, the record will be passed on to the owner of the destination premises for completion and submission. If a broker buys and offloads the animal(s) onto his premises, he will then complete the premises of destination blocks and submit

the record to TAHC. Any subsequent movement from the broker's premises would then be via initiation of new movement record.

- **Slaughter:** Provide name of slaughter facility. Movements to slaughter are exempt from the 20% testing requirement but animals 16 months of age and older that are slaughtered do count as eligible mortalities for any other future movements.
- **Animal Information:**
 - **Animal ID:** Electronic individual ID device number or NUES (USDA Brite) tag. Both of these devices as well as applicators may be obtained from TAHC regional offices.
 - **Other ID:** Plastic bangle or flap tags or any other visible owner management ID devices.
 - **Species:** Enter the appropriate CWD susceptible species (red deer, sika, elk, or moose).
 - **Age:** Enter approximate age in years or months. Enter A for adult.
 - **Sex:** M or F
- **Signatures:** The form must be signed by the person responsible for the animals at the Premises of Origin **AND** the person responsible for the animals at the Premises of Destination. When completing and submitting the form electronically, please type in the names of the authorized persons involved in the movement.

Form Submission

It is the responsibility of both the buyer and the seller to submit this completed form to the Texas Animal Health Commission. In a contemporaneous transaction in which this form is fully completed by both buyer and seller, only one copy of the fully completed form need be submitted to the Texas Animal Health Commission.

This form may be either printed, completed and mailed to the address shown on the form; faxed to the number on the bottom of the form; or sent by e-mail to CWD_movement@tahc.texas.gov

Records Retention

Buyer **and** seller, whether at the premises of origination or the premises of destination, should maintain a copy of the completed form for five (5) years.

- By Mail: TAHC, Attention: CWD Movement Reporting, P O Box 12966, Austin, TX 78711-2966

For further information contact 1-800-550-8242 x 777.

In order to transport or move a CWD susceptible species, live, within the State of Texas, the person controlling the CWD susceptible species must have a current annual inventory within the past 12 months and shall meet **one** of the following:

- Test results of NOT DETECTED on 20% of eligible mortalities of all CWD susceptible species maintained on a premises; or
- Have a minimum of Year 2 Status in a TAHC herd certification program in accordance with the requirements of the Chronic Wasting Disease Herd Status Plans for Cervidae; or
- Be moved directly from the premise where they were trapped or held to a recognized slaughter facility. A recognized slaughter facility is a slaughter facility operated under the state or federal meat inspection laws and regulations.

Location Numbering Systems

Two processes, explained below, support the administration of location identifiers that adhere to the federal standards. State-issued location identifiers are referred to as LIDs, and the location numbers states' obtain through the federal allocator are referred to as PINs. **Both numbers are nationally unique and recognized.**

Premises Identification Number (PIN)

A national premises identification number (PIN) is a unique number, permanently assigned to a physical address where agricultural animals are located. All owner and premises information collected is stored and maintained in a federal database. Texas utilizes the USDA-APHIS provided Standardized Premises Identification System to obtain a PIN from the federal allocator. A PIN consists of seven alphanumeric characters, beginning with two leading zeros. **To obtain a PIN, contact the TAHC Animal Disease**

Traceability (ADT) department at 1-800-550-8242 ext. 733 or register online at www.tahc.texas.gov/adt

Location Identification Number (LID)

Texas has a state system and process for issuing a location identification number (LID). A LID is assigned to an owner's contact and operation information, which are stored in a state administered database. The information collected is not shared with the federal system, only the LID number itself, is reported to the federal system as a valid number. All LIDs start with the state postal abbreviation (TX) followed by six random alphanumeric characters, which makes the LIDs nationally unique. **To obtain a LID, contact your local TAHC region office.**

Official ID

A complete list of acceptable identification devices/methods may be found at www.tahc.texas.gov, but the most commonly used devices include USDA NUES metal tags and US origin AIN 840 series Radio Frequency Identification (RFID) tags. Producers are encouraged to contact their veterinarian or TAHC to determine which method of tagging will be best for their operation.

National Uniform Eartagging System (NUES) tags

State animal health officials and accredited veterinarians may provide NUES identification eartags to producers who wish to use them for official identification and other purposes without administering the eartags through a specific disease program. NUES eartags are designed for one-time use (tamper evident) and are imprinted with the 9 character NUES number and the Official US Eartag Shield. **NUES tags are available at no cost, while supplies last. The tags and/or pliers may be obtained by contacting your local TAHC region office.**

Animal Identification Number (AIN) Devices

AIN device manufacturers and managers distribute AIN devices with the 840 prefix to producers. All recipients of AIN devices must first have a LID or PIN and provide that number to the person that they are obtaining the devices from. Producers electing to use AIN devices may contact the supplier of the tags in their area. The complete listing of approved AIN devices and the AIN tag manufacturer's information can be found at:

http://www.aphis.usda.gov/traceability/downloads/AIN_device_list.pdf. **840 RFID tags and application pliers are available at no cost, while supplies last. The tags and/or pliers may be obtained by contacting the TAHC ADT department or your local TAHC region office.**

For additional information, visit www.tahc.texas.gov, contact the TAHC ADT department at 1-800-550-8242 ext. 733, or your local TAHC region office.
